Scope of Online Resume Project – MI 349
Kelly Skarritt

Purpose: This websites purpose is to be an online resume for myself. It will be bigger and better than the one I have now.

Description: This website will be a tool for me to use to attract future employers. Right now, I have a resume website already. However, I want it to be more advanced. There will be a home page with information about me, along with a page for skills and a page for experience. Also, there will be a page for my portfolio. Here, I will have screenshots and links of things I have created. Finally, there will be a contact section.

Personas: Future employers for web development companies looking to gauge my skill set in a creative and easy way. Employers will be able to get an exact glimpse of what I know by seeing my work in action. It will also be for companies in need of a UI/UX designer.
